

OPERATION: TREADSTONE

INDUCTION REPORT: 6/2 99

Last Name: [REDACTED]	<sup>9485</sup> Date of birth: [REDACTED]	CHK
First Name: [REDACTED]	<sup>3456</sup> Place of birth: [REDACTED]	CHK
Initials:	<sup>8353</sup> Blood Group: A (+)	CHK

Subject demonstrated resistance during admission process. Application of stressed measures ordered.

5/15/99

Subject submitted to "Tank" treatment. Sleep allowed to less than 2 hours/day. The amphetamines injections have begun.

5/21/99

Subject has been re-submitted to the "Tank" treatments. His resistance is now weaker. He has not slept for 52 hours. Seems lost but still resists to the orders of the supervisor.

5/24/99

Subject is now at the level 3 of the project. Dr. Albert Hirsch allowed him to sleep and eat as requested. Supervisor decides to enhance drug treatment. The subject begins to show displaying signs of coordination dysfunctions.
